

## **Raw AloeForce - perfect for radiation protection**

Although Aloe use has been known to detox by being a laxative - True detoxification is done by the cells and the immune cells of our bodies. Nutrition can help strengthen and laxatives can purge but profound and true detox happens at the cellular level. Only unheated (not cold processed – but ‘raw’), ‘live’ raw Aloe contains and delivers the following unique and profound properties to detoxify the body:

**1. Cellular fortification and detoxification:** The large polysaccharides (usually broken by processing) actually feed cells directly making them more fortified against invasion (**fortifies cell membranes**) AND improving their cellular metabolism to **push out their toxins more effectively and efficiently**. Thus cells are protected against damage and invasion AND push out toxins better.

**2. Detoxifying glands and systems:** When detox is necessary it is crucial that our detoxing organs, glands and systems are strong and capable. Unbroken Aloe feeds the cells of the detox organs (and more) making them more **efficient, cleansed and fortified**. This includes the **liver, kidneys, gall bladder, intestines, blood and immune cells ...** AND improves our intercellular communication to detoxify the body optimally.

**3. Direct Immune cell enhancement.** Unbroken Aloe directly **enhances the main white cells of our immune system** (macrophages) **to be up to TEN times more effective at ‘gobble’ up toxins** (or any unwanted entities) **AND orchestrating all the functioning of the body (including detoxing** radiation from the cells and entire body).

**With our unheated Aloe – the idea of detox goes way beyond gastrointestinal detox to what is truly needed daily and in crisis situations– cellular detox and fortified detoxifying organs and systems!!**

**Only raw, ‘live’ unbroken Aloe Vera has the properties to work in our bodies to insure the most efficient and powerful detoxifying system ever created = our own body!**

Stay cleansed and fortified - Drink to your Health!
